

Damage Inspection (DINS) Database Dictionary – Statewide and Incident

Order	Field Name	Alias	Description	Field Size	Domain
1	OBJECTID	OBJECTID	An ObjectID is a unique, not null integer field used to uniquely identify rows in tables in a geodatabase. ... Tables that are created through ArcGIS, or created outside ArcGIS then registered with the geodatabase, automatically have an ObjectID field added to them. The values in this field are maintained by ArcGIS. Caution: The Objectid can change when a running a geoprocess tool. This id is not reliable as a primary key.	Objectid	
2	SHAPE	SHAPE	The field stored as geometry type is called SHAPE when created through ArcGIS. Geometry is the data type used by ArcGIS.	Geometry	
3	KEYID	KEYID	Calculate the objectid into this field to preserve the objectid if needed. The objectid may change when a geoprocess is executed.	Long Integer(10)	
4	INSPECTORFIRSTNAME	* Inspector First Name	First name of the person conducting the inspection	Text(25)	
5	INSPECTORLASTNAME	* Inspector Last Name	Last name of the person conducting the inspection	Text(50)	
6	INSPECTIONDATE	* Inspection Date	The date of the inspection. Field defaulted and hidden for larger incidents	Date	
7	DAMAGE	* Damage	Damage status of the structure. This field drives the symbology for the point. (Destroyed (>50%), Major (26-50%), Minor (10-25%), Affected (1-9%), Inaccessible, No Damage)	Text(50)	◆
8	STREETNUMBER	* Street Number	Physical street number observed by the field inspector. Unique number for each building in a street or area.	Long Integer(10)	
9	STREETNAME	* Street Name	Physical street name observed by the field inspector of the inspected property	Text(50)	
10	STREETTYPE	* Street Type	Physical street type observed by the field inspector. In addition to the Street Name, an indicator of the type of street, known as generic e.g., Road, Avenue, Street, Court, or Blvd.	Text(10)	◆
11	STREETSUFFIX	Street Suffix	Physical street suffix observed by the field inspector. Identifies a specific building e.g., apartment 102, building a, or lot 12.	Text(10)	
12	CITY	* City	Physical city observed by the field inspector in which the inspected property resides.	Text(50)	
13	STATE	State	U.S. state or territory in which the inspected property resides – defaulted to CA.	Text(2)	◆
14	ZIPCODE	Zip Code	Numbers that are added to a postal address to assist the sorting of mail. Not widely used	Long(10)	
15	CALFIREUNIT	* CAL FIRE Unit	The three-letter organizational unit designation. Field defaulted and hidden for larger incidents. (e.g., MEU)	Text(3)	◆
16	COUNTY	* County	County Name. A division of a state or country for local government. Field defaulted and hidden for larger incidents. (e.g. Riverside)	Text(50)	◆
17	COMMUNITY	Community	Used if a local area has an unofficial name but commonly recognized name	Text(255)

Damage Inspection (DINS) Database Dictionary – Statewide and Incident

Order	Field Name	Alias	Description	Field Size	Domain
18	BATTALION	* Battalion	Geographic area specific to the unit in which the structure resides. Field defaulted and hidden for larger incidents. (01, 02, 03 ... 30)	Text(100)	◆
19	INCIDENTNAME	* Incident Name	The name of the incident for which data is collected. This field is hidden and defaulted for larger incidents.	Text(20)	
20	INCIDENTNUMBER	Incident Number (e.g CAAEU 123456)	The unique identifier for the incident. Begins with the state and unit followed by a number. This field is hidden and defaulted for larger incidents.	Text(20)	◆
21	INCIDENTSTARTDATE	Incident Start Date	Date at which the fire was first reported. This field is hidden and defaulted for larger incidents.	Date	
22	HAZARDTYPE	Hazard Type	The type of hazard for which damage inspection is conducted. This field is hidden and defaulted for larger incidents (Fire, Earthquake, Flood, Civil Disturbance, Hazardous Material)	Text(20)	◆
23	WHEREFIRESTARTEDONSTRUCTURE	If Affected 1-9% Where Did Fire Start	The location on the structure where the fire likely started if visible at all. Only recorded for Affected 1-9% damage category. (Roof, Eaves, Vent, Siding, Window, Deck on Grade, Deck Elevated, Attached patio Cover/Carport, Attached Fence, Unknown)	Text(50)	◆
24	WHATDIDFIRESTARTFROM	If Affected 1-9% What Started Fire	The cause of the fire if damage is only Affected 1-9%. May not be reliably determined. (Direct flame impingement, embers, radiant heat, unknown)	Text(50)	◆
25	DEFENSIVE ACTIONS	Structure Defense Actions Taken	Visible signs of defensive actions taken to save the structure. (Combination of Actions, Dozer Fuel Break, Engine Company Actions, Fire Retardant Drop, Hand Crew Fuel Break, Other, Unknown)	Text(50)	◆
26	STRUCTURETYPE	* Structure Type	A residence that is a site-built home; A structure that contains one or more dwelling units; A condominium, rental residential unit or other residential dwelling unit that is part of a larger structure, if the property interest in the unit is separate from the property interest in the larger structure; A modular home constructed off-site; A manufactured dwelling	Text(255)	◆
27	STRUCTURECATEGORY	Structure Category	Field calculated on the backend from the Structure Type field. Field is used to report numbers to the 209. (Mixed Commercial/Residential, Multiple Residence, Nonresidential Commercial, Other Minor Structure, Single Residence, Infrastructure)	Text(100)	◆
28	NUMBEROFUNITPERSTRUCTURE	# Units in Structure (if multi unit)	The number of units in multi structure complex (i.e. how many apartments are in on damaged building)	Long(5)	◆
29	NOOUTBUILDINGSDAMAGED	# of Damaged Outbuildings <120	The number of damaged outbuildings on the property that are less than 120 sqft and hence are	Long(5)	◆

Order	Field Name	Alias	Description	Field Size	Domain
		SQFT	not collected as an outbuilding		
30	NOOUTBUILDINGSNOT DAMAGED	# of Non Damaged Outbuildings <120 SQFT	The number of nondamaged outbuildings on the property that are less than 120 sqft.	Long(5)	◆
31	NOOFCARSONPROPER TY	# of Damaged or Destroyed Cars on Property	The number of damaged or destroyed cars on the property. Hidden unless asked for by an affected jurisdiction.	Long(5)	◆
32	ROOFCONSTRUCTION	* Roof Construction	Most flammable roof construction materials present on the structure. (Wood, Asphalt, Concrete, Tile, Metal, Other, Unknown)	Text(50)	◆
33	EAVES	* Eaves	Eave style on the structure. Most combustible variety present on structure is selected. (Enclosed, Unenclosed, No Eaves, Unknown)	Text(50)	◆
34	VENTSCREEN	* Vent Screen	Size of attic and basement vents if present. Most combustible variety present on structure is selected. (Mesh Screen <= 1/8", Mesh Screen > 1/8", Unscreened, No Vents, Unknown)	Text(50)	◆
35	EXTERIORSIDING	* Exterior Siding	Exterior siding material on the structure. Most combustible variety present on structure is selected. (Metal, Stucco/Brick/Cement, Vinyl, Wood, Other, Unknown)	Text(50)	◆
36	WINDOWPANE	* Window Pane	Style of exterior windows. Most combustible variety present on structure is selected. (Single Pane, Multi Pane, No Windows, Unknown)	Text(50)	◆
37	DECKPORCHONGRADE	* Deck/Porch on Grade	Predominant construction materials for deck/porch. Most combustible variety present on structure is selected. (Composite, Wood, Masonry/Concrete, No Deck/Porch, Unknown)	Text(50)	◆
38	DECKPORCHELEVATED	* Deck/Porch Elevated	Predominant construction materials for deck/porch. Most combustible variety present on structure is selected. (Composite, Wood, Masonry/Concrete, No Deck/Porch, Unknown)	Text(50)	◆
39	PATIOCOVERCARPORT	* Patio Cover/Carport Attached to Structure	Predominant construction materials for patio cover/carport. Most combustible variety present on structure is selected. (Combustible, Non-Combustible, No Patio Cover/Carport, Unknown)	Text(50)	◆
40	FENCEATTACHEDTOST RUCTURE	* Fence attached to structure	Predominant construction materials for attached fences. Most combustible variety present on structure is selected. (Combustible, Non-Combustible, No Fence,	Text(50)	◆

Order	Field Name	Alias	Description	Field Size	Domain
			Unkown)		
41	PROPANETANKDISTANCE	Distance of propane tank to structure	Distance of Propane Tank to Structure (0-10', 11-20', 21-30', >30', Not Applicable)	Text(50)	◆
42	UTILITYMISCSTRUCTUREDISTANCE	Distance From Residence to Utility/Misc Structure > 120 SQFT	Distance from primary residence to utility/misc structure > 120 sqft	Text(50)	◆
43	COMMENTS	Comments	Any additional information pertinent to the inspection.	Text(255)	
44	FIRENAME	Fire Name (secondary)	Secondary or initial fire names used during complex fires.	Text(50)	
45	APN	APN (parcel)	Assessor Parcel Number assigned by the local assessor. Source: County parcels	Text(40)	
46	ASSESSEDIMPROVEDVALUE	Assessed Improved Value (parcel)	County assessor's office determination of the value of improved structures on parcel. Source: County parcels	Double(10)	
47	YEARBBUILT	Year Built (parcel)	Year that primary structure in parcel was constructed. Source: County parcels	Long(4)	
48	SITEADDRESS	Site Address (parcel)	The site address is usually comprised of the street number, name, type and address suffix, city, state and zip Code. Source: County parcels	Text(255)	
49	SAPPLACARDTYPE	SAP Placard Type	Used by local government officials conducting Safety Assessment Program (SAP) inspections, sometimes known as RESA. Documents SAP status. Added in '19 to help local officials expedite recovery.	Text(50)	◆
50	SAPINSPECTIONDATE	SAP Inspection Date	Used by local government officials conducting Safety Assessment Program (SAP) inspections, sometimes known as RESA. Documents date of SAP inspection. Added in '19 to help local officials expedite recovery.	Date	
51	SAPINSPECTIONID	SAP Inspection ID	Used by local government officials conducting Safety Assessment Program (SAP) inspections, sometimes known as RESA. Documents the ID of the SAP Inspector. Added in '19 to help local officials expedite recovery.	Integer(20)	
52	EDITSTATUS	Edit Status	Used to identify records that need field correction.	Text(50)	◆
53	REPORTED	Reported	Used to identify records that have been cleared for reporting in the 209. Updated twice daily in the morning and afternoon before release of the report.	Text(3)	◆
54	SHARED	Shared	Used to identify records that have been shared to the public. If Edit Status = Approved and Reported = Yes then Shared = Yes. Controls view definition on publicly shared view layer.	Text(3)	◆
55	DELETEFIELD	Delete (Select 'Yes' to delete.)	Allows the field personnel and QCer to mark record for deletion.	Text(3)	◆
55	GLOBALID	GLOBALID	A field of type UUID (Universal Unique Identifier) in which values are automatically assigned by the geodatabase when a table row is created.	GlobalId	
56	CreationDate	CreationDate	The system will automatically populate the date and time stamp when the record was created.	Date	
57	EditDate	EditDate	The system will automatically populate the date and time stamp when the record was edited.	Date
